AFTER SALES SUPPORT / CUSTOMER CARE

WARRANTY

AEG appliances come with a 12 month warranty from date of purchase. When you register your new appliance your warranty will be extended to 2 or 5 years (depending on model). During your warranty period you are protected against the cost of parts, call-out and labour charges. All work is carried out by our national network of approved AEG engineers.

You can register your appliance by completing the warranty registration card enclosed with your appliance, calling our dedicated warranty registration phone number printed on the card, or online at www.aeg.co.uk

2 YEAR GUARANTEE   **5** YEAR GUARANTEE

For additional peace of mind you have the option to extend your guarantee even further with our AEG Protection Plan. You'll be protected against damage caused by accident from the moment you join and if one of our approved engineers can't fix it, you could receive a brand new replacement. This coverage is provided by our specialist insurers Domestic and General.

To find out more visit www.aeg.co.uk or call 0800 479 0775

CUSTOMER SERVICE

Should you need to contact us about your product we have a dedicated AEG customer service team to help. Our team is based in the AEG UK head office and can be contacted by phone on 03445 611 611 or via www.aeg.co.uk

LOCAL SERVICE, NATIONWIDE

Our national network of Service Force agents provide product maintenance, genuine parts and repairs for all AEG Major Appliances. Genuine AEG parts ensure you continue to experience the excellent performance you expect from your AEG product.

If you require a visit from one of our agents for your Major Appliance please call our Service Force team on 03445 616 616.

IN THE PERFECT HOME, YOU'RE IN COMPLETE CONTROL

Welcome to AEG's kitchen and laundry range. Inside every appliance, you'll find intelligent technology and responsive design, guaranteeing you exceptional performance and results time after time. You'll discover that one touch redefines what's possible at home.

We innovate so that you can elevate what you do to new heights every day.

WE ARE PIONEERS WITH A VISION

We thrive upon innovation designed to give you the ultimate feeling of mastery in your home and laundry care. We see your needs of today. And foresee the ones of tomorrow. So that you can achieve results that don't just meet your standards, but exceed them.

We believe in intelligent technology and exceptional performance, helping you to take anything you do at home to the next level, every day.

We are proud of our distinctive engineering and responsive design, guaranteeing you the performance you expect and deserve.

We are a brand that people turn to for intelligent and exciting new ways to guarantee their outcome.

This has been our passion for over 125 years, and continues to be our passion today.

We are AEG.

And together with you, we are always an idea ahead.

CONTENTS

KITCHEN

LAUNDRY

FLAVOUR.
CONDUCTED YOUR WAY.

The new Mastery Range from AEG works with you in unique ways to take your cooking to the next level. Every appliance ready to play their part, working in harmony and instantly responding to your second-by-second commands.

Now, for the first time, you can even tell the oven how you want your dish cooked – using just the words you would in a restaurant – rare, medium, well done. Or play with a hob where the entire surface follows every pan you move, no matter how big or small. It's time to expect more from the way you cook. Step into the world's most responsive cooking experience.

MAESTRO, YOUR
KITCHEN IS WAITING.

REFRIGERATION

Flavour is all about freshness and storing ingredients – the right humidity and temperature is vital. But how do you want your fridge arranged? Our solution lets you decide. Everything and anything fits in perfectly for long-lasting flavour.

Space management
Adaptable to your taste.

Taste and texture
Nature's freshness preserved.

Energy efficiency
Take care of the environment
and your household budget.

REFRIGERATION WHAT'S NEW

Create your own perfectly organised fridge with the CustomFlex® storage system. This unique and practical innerdoor storage system allows you to arrange shelves, clips and compartments in all shapes and sizes in hundreds of different layouts, so there's always one that works best for you at any time.

ADAPTABLE FOR EVERY TASTE
CustomFlex®
CustomFlex® enables you to move and rearrange compartments quickly and easily to maximize storage space.

Retractable lower shelf
for flexible storage.

Self-closing door
An elegant solution, with no risk of
slamming. Automatically closes from
an opening angle of 25–30 degrees.

High Efficiency LED lighting
ensures a good spread of light,
shining downwards in the fridge.
An intelligent fan function prevents
warm areas in the upper part of
the fridge and creates an even
temperature in all fridge levels.

A+++

Did you know?
Our appliances are leaders
in energy performance, with
the highest ratings of up to
A+++ -20% energy saving.

Display
Touch controls with new
white LED digital display.

REFRIGERATION WORTH KNOWING

Precision chilling for exceptional cooking. Carefully sourced ingredients need exact conditions to preserve their greatness. Our Zero Degree compartments make it possible to create different chilling conditions in each part of your refrigerator. Adjust each drawer's temperature at a touch.

Without Zero Degree

With Zero Degree

Without Zero Degree

With Zero Degree

Top:
Ripe vegetables.

Bottom:
Fish and meat that require more humidity and lower temperature.

Door:
Glass jars, cans and drinks.

Exceptions:
Potatoes and apples are best stored outside the fridge.

AEG TwinTech® technology
Unlike conventional fridge freezers that use cold, ultra-dry air from the freezer and recirculate it to cool the fridge, TwinTech® Plus units have two separate cooling systems. This provides the ideal humidity in each compartment, preventing food from drying out in the fridge and delivering frost-free storage in the freezer.

Nature's flavours in peak condition
When each ingredient and element of your cooking is carefully chosen, they need to remain at their best until you come to use them. With the TwinTech+ system, carefully selected temperature and humidity levels are maintained with minimal fluctuations. So, your produce is not subjected to the variations that cause its quality to deteriorate. Your ingredients are chilled in peak conditions – fruits and vegetables stay crisp and bursting with flavour, meat and fish stay vibrant. From the moment you choose them to the moment they reach your plate.

CUSTOMFLEX® | SCE81864TC

ADAPTABLE FOR EVERY TASTE

CustomFlex® a unique storage system that allows you to organise your fridge just the way you want. Move and rearrange compartments quickly and easily to maximise storage space. Keeping all your fresh ingredients to hand is key to creating fresh, delicious dishes. Clips for herbs, clear boxes for cheeses, secure shelves for dairy, sauces and condiments. All positioned exactly where you want them to be. Finally a fridge that adapts to your taste.

INTEGRATED LONG FRESH FRIDGE
SKK81826ZC

KEY FEATURES

LongFresh | **Dynamic air** | **Soft close door** | **Touch controls**

The LongFresh feature is a zero degree compartment with adjustable temperature settings & separate humidity. To maintain the deep blushing crimson of a fillet of beef, to ensure the sweet freshness of a lobster tail, or to hold the ultimate flavour of fresh fruit they must be treated and chilled with precision. The two Zero Degree compartments in the AEG refrigerator allow you to choose and adjust the humidity and temperature settings in each drawer. Ensure that each element is at peak condition, by chilling them in unique conditions.

DynamicAir technology maintains the airflow inside the fridge, ensuring consistent temperature at every shelf so that your ingredients stay fresh.

OVENS

However you like to cook and whatever your favourite dishes, there's an AEG oven that's just right for you. Featuring our intelligent technology, every oven makes it effortless and enjoyable to create great tasting food, exactly the way you like it.

SteamBoost
Turn flavour up to full.

SteamPro
Master even the most
complex flavours.

SurroundCook®
Expect even, every time.

SteamCrisp
Steam. Your new standard for flavour.

SteamBake™
Add steam for
crispier baking.

SenseCook®
Rare. Medium. Well done.
At your command.

OVENS
WHAT'S NEW

The latest furniture trends are becoming more linear and we have designed our products in line with that. We've also included more glass and less stainless steel for a seamless finish.

Command wheel
An innovative Command Wheel removes the need for a busy dashboard and makes the cooking experience simple and streamlined for perfection on a plate, every time.

Humidity sensor
Our unique humidity sensor automatically ensures you introduce the exact amount of steam into your dishes for perfect taste and texture.

The AEG Vacuum Sealer drawer lets you be a SousVide pro chef at home, by sealing in the flavour, moisture and nutrients of ingredients until you are ready to cook them to perfection.

LCD display
With just a touch, your current cooking settings appear immediately on the clear colour LCD display for at-a-glance monitoring of your meal, making adjustments exact and precise.

✎ Food Sensor

Rare · Medium · Well Done

By precisely measuring the core temperature of your food, the Food Sensor lets you know when your rare, medium or well done meat is ready. As well as cooking fish, casseroles and vegetables just the way you like them.

OVENS
WORTH KNOWING

For the first time, you can trust
that your oven understands
the result you want, just from
the words you choose.

....

Why steam?
- **Prevents flavour exchange**
  Stops flavour exchange
  between different dishes.
- **Food stays moist**
  Prevents food from drying out.
- **Preserves nutrients**
  Preserves nutrients,
  vitamins and minerals.
- **Evenly cooked**
  Cooks food more evenly
  from surface to core.
- **More efficient**
  Delivers heat more efficiently
  to the food than dry, hot air, so
  the temperature can be lower.

MASTER A NEW LEVEL OF FLAVOUR. JUST ADD STEAM TO HEAT.

By adding steam to traditional heat, our range of ovens ensures your dishes are cooked to your exact preference. The combination of heat and steam delivers crisp and golden on the outside and juicy and succulent on the inside – every single time. It's an uncomplicated and highly effective way of ensuring that everything you cook is packed with maximum flavour.

FREESTANDING COOKING WORTH KNOWING
Standard oven

SurroundCook® oven

SURROUNDCOOK®

The SurroundCook® oven ensures that every part of your dish is getting exactly the heat it needs. Evenly. Consistently. Wherever it's placed. Whether it's one dish or several. No more turning dishes halfway through cooking. Just the results that meet your expectations.

FOOD SENSOR

By precisely measuring the core temperature of your food, the Food Sensor lets you know when your rare, medium or well done meat is ready. As well as cooking fish, casseroles and vegetables just the way you like them.

Food Sensor

Rare   Medium   Well Done

XXL CAVITY

Our large main oven has more usable space which allows you to cook on all 5 levels simultaneously, which means you can bake 150 cookies at the same time.

CATALYTIC LINING

The Catalytic lining oxidises grease and dirt within both ovens, aiding oven cleaning.

INDUCTION COOKING | 49176IW-MN

FREESTANDING COOKING

Our MaxiSense® induction hob has flexible sections ensuring pots and pans have maximum space and choice of position. The 4 zones can be switched to 2 large cooking areas, ideal for large pans or fish kettles.

Stop + Go allows you to reduce all the hob zones to Keep Warm setting and back again - all at the touch of a button. Ideal for unexpected interruptions.

Touch controls for both hob and oven functionality offer precise operation, give a flush finish to the cooker and are easy to wipe clean.

To help you reach perfection the food probe measures the precise temperature deep inside the food.

MaxiSense® **Flexibridge** **DirektTouch** **Hob to hood**

MaxiSense® Simply cover the centre of the cross, the cooking zone will adapt to the size and shape of your cookware.

A special 4-segment induction cooking area where you can choose to connect up to 4 zones, offering one of the largest single cooking areas with exceptional, uniform heat distribution. Perfect from the smallest blini pan up to a super large casserole dish.

DirekTouch slide controls for quick, precise heat level selection.

Hob2Hood completely automates the control of the cooker hood from the hob. Turn the hob on and the hood will turn on automatically, power boost on hob will put hood on intensive speed.

HOODS

Our cooking environments need to be fresh, bright and peaceful, enriching the time that we spend there. We use advanced technology to ensure that the design and build of our cooker hoods give you the optimum combination of high-end design and powerful functionality.

Enjoyable ambience
Creating the perfect setting.

Assisted convenience
Supporting you automatically.
Just when you need it.

Architectural solutions
A subtle or a bold
statement. Your choice.

Performance
Performance you can rely on.

HOODS
WHAT'S NEW

AEG's intelligent Hob²Hood System ensures your hood works in harmony with your hob as soon as you turn your hob on. A wireless signal is sent to the hood, switching on the lights and providing optimal visibility.

Our new premium and modern user interface combines super responsive capacitive touch buttons along with back lit white LED indicators. The LED turns red to show which feature is on or off.

Dimmable LED
Provides the possibility to adjust the intensity of the light according to your needs, creating the perfect ambient illumination in your kitchen.

SilenceTech
Our more advanced hood technology reduces the noise level down to the lowest number of decibels so that you can cook powerfully and enjoy the experience without loud sounds from the appliance.

Aligned across our range, your choice of hood will integrate seamlessly with any of our hob models. Our top line models feature our signature flow line for design harmony, together with a sophisticated white LED display on layered glass and metal.

Run it for less energy
Our hoods are highly efficient, using less energy than standard models. This is thanks to our brushless Inverter Technology. In fact, when you run the hood at its maximum speed, you'll use up to 40% less energy than standard models. And at the minimum setting, it needs less energy to run than a standard light bulb.

HOODS
WORTH KNOWING

Depending on the model, our high-performance hoods filter air and either expel it outside or clean and recycle it back into the kitchen.

EXTRACTION VERSUS RECIRCULATION

Almost all hoods can use a venting or recirculating setting.

Venting Hoods
Air is drawn in through the hood's fan and passes through its grease filter. The air is then directed outside through the exhaust duct in the roof. Fresh air must be supplied to prevent negative pressure.

Recirculating Hoods
In some homes, air cannot be expelled outdoors for structural reasons. If this is the case, it is particularly important that you have a high-quality hood with a reliable filtration system. Recirculating hoods draw in air that passes through a grease filter and a carbon filter, before being conveyed back into the kitchen. As this method includes no air from outside, it's important to ventilate the room briefly after cooking to prevent excess moisture building up.
MAINTENANCE

To ensure consistent performance, it's important to replace your hood's filters regularly. Hoods depending on installation (venting or filtering), have grease filters or grease and charcoal filters. The grease filter is in the bottom and is the first to filter the air. The charcoal filter is mounted on the motor. Grease filters must be cleaned once a month, charcoal filter every 3-4 months.

As an alternative to our standard or long life charcoal filter, you can choose AEG's high-performance, re-usable Ultra Charcoal Filter. This simply needs to be refreshed in the oven every 3-5 months (you'll find full instructions on how to do this in the user manual included with the filter).

Motor

Charcoal filter

Frame

Large grease filters
Ultra Charcoal Filter
A charcoal filter effectively reduces smells in the kitchen, with a fast odour dispersion time. This type of filter, with its distinct hexagonal shape, can 'regenerate' rather than needing to be replaced.
Once treated, it is easy to re-install.

HOODS | DBK7990HG

A FRESHER KITCHEN, HANDS FREE

The AEG **Hob²Hood** adapts to your cooking to keep your kitchen free of steam and vapours without you even having to touch it.

As you cook, the hood activates automatically, monitoring the fluctuating heat and steam of every simmer and boil, effortlessly maintaining the freshness of your kitchen. Your attention stays, as it should, on preparing, finessing and enjoying your dish.

A top of the line design hood, efficiently cleans the air even in a large kitchen, thanks to the powerful energy efficient motor. This hood is a chimney model and gives your kitchen a strong design statement.

DISHWASHERS

It's not just about the food – the style of cutlery and plates affect our perceptions of what we eat. A dark chocolate dish looks best when served on an angular plate, while a round plate is better for cheesecake. So you need a range of tableware that complements your food presentation and can be cared for in the most efficient way.

Superior cleaning and drying
Unrivalled coverage,
absolute clean and care.

Adaptability
Conveniently on time.

Comfort
Lifts gentle to a new level.

DISHWASHERS WHAT'S NEW

1 WORLD'S FIRST

The ComfortLift® dishwasher is the first of its kind to gently slide the lower basket up for easy, ergonomic loading and unloading.

ComfortLift®

- Lower rack lifting mechanism, reduces the need to bend loading and unloading your dishes.
- 25cm rack elevation compared to a standard dishwasher.*
- Tested for 20.000 cycles with full standard loads (18kg).

*Excluding height from floor

25CM

Internal LED Light
The advanced, low-energy internal light gives you better visibility when loading and unloading your dishes.
AirDry technology
Uses natural airflow to finish the drying. By automatically opening the door by 10cm in the last part of the cycle, you will get maximum drying performance while effectively reducing your energy costs – leaving your dishes spotless.

Delay time
Allows you to select when the machine should start.

Extra silent
Low noise and minimal disturbance.

TimeSaver
50% less time thanks to increased power speed and water pressure.
ComfortRails
Smoothly slide the basket into place without any rattle of the plates. Always smooth to load and unload. You never have to worry about any chips or cracks in your dishes.
Sliding hinges
Allows you to install the dishwasher with any door length without the need to cut the kitchen plinth. This is also suitable for plinthless kitchens. The best solution on the market – patented by AEG.

DISHWASHERS WORTH KNOWING

The multiple double rotation of the Satellite Spray Arm sprays from continuously varying angles, leaving your dishes and cookware gleaming.

versus

Standard spray arm coverage

Satellite spray arm coverage

Removable cutlery tray
Take your tray with you to the kitchen cutlery drawer for easy unloading. Best in class solutions for easy loading and unloading.

Without

With SoftGrips and SoftSpikes®

Safer protection for delicate glasses
The SoftGrip mechanism is both secure and gentle while resting on the SoftSpikes®, so there's no need to hand-wash glasses any more.

15 place settings
Our dishwasher is designed to offer far more capacity than a standard one, with the flexibility to fit all types of loads. The cutlery tray is placed in the top of the machine, rather than a cutlery basket placed on the lower rack, freeing up the bottom level to fit more in. Our new dishwasher can fit 15 place settings.

Glass Care Programme
Special 45°C glass programme assures perfect washing results while protecting your most precious glass, crystal and china.

COMFORTLIFT® | FSK93800P

IMAGINE

Imagine putting your precious sweater in the washer. Imagine trusting a silk dress to a dryer.

We've not only imagined it, we've done it. Washed the black dress time after time. Dried a soft wool sweater over and over. Every time they emerge without shrinking or fading, still vibrant and soft. Because AEG has redefined what a washer and dryer are. Protectors of fabric. Defenders of colour. Guardians of fibres.

Unprecedented care for the life of your clothes.

IMAGINE THAT.

DESIGNED WITH CARE

Our unique, innovative design
is more than a pretty face.
It also conveys superior quality
and technical advancement.
For our new range, we redefined
the door's design for greater
visibility and reinvented
the control panel. Just turn
the dial for an exceptional,
first-touch experience.

Premium door finish
Inspired by the electric turbines
manufactured at the AEG
Turbine Factory in Berlin.

Balanced design
A symmetrical Germanic design
with a central dial to balance
the control panel.

Focus dial
Real stainless steel insert on
the control panel and a premium
metal coating on the dial
with a distinct physical and
auditory 'click' feedback.

MEET THE LITTLE BLACK DRESS GUARDIAN

While conventional washing machines need high temperatures to activate detergents and clean properly, the SoftWater Technology in AEG 9000 Series washing machines purifies and softens water before it enters the drum. So detergents can work at their best, even at the lowest temperatures.

8 0 0 0   S E R I E S

MEET THE COMPLETE FIBRE GUARDIANS

Clean and care for every fibre and tumble dry every delicate stitch. Only the AEG 8000 Series with ÖKOMix Technology and AbsoluteCare® System delivers care so gentle it's like hand-washing and flat-drying your softest, most delicate garments – from woollens to high-performance outdoor gear, every time.

7 0 0 0   S E R I E S

MEET THE GENTLE TEXTURE PROTECTORS

A sharp shirt immaculately washed and finished with steam to reduce wrinkles. A sheer blouse perfectly tumble dried with just half the temperature of a conventional dryer. AEG 7000 Series laundry Systems bring together ProSteam® and SensiDry® Technologies to protect texture and reduce wear, achieving impeccable results the gentlest way.

6 0 0 0   S E R I E S

MEET THE EVERYDAY QUALITY PRESERVERS

Your everyday clothes look like new, for longer. The AEG 6000 Series laundry systems use ProSense® Technology to save energy and time with even the smallest load. Making sure your clothes are never over-washed, never over-dried. Preserving everyday quality, day in, day out.

| WASHING MACHINE

PROOF POINTS

NO FADING, WASH AFTER WASH*

Softer water, kinder to clothes
Because our advanced SoftWater Technology purifies and softens water before it enters the drum, detergents can work much more effectively at low temperatures, delivering 60°C cleaning performance at only 30°C. So colours will keep their intensity wash after wash, and black won't fade to grey.

All mains water contains minerals that can be harsh on fabrics.
These AEG washing machines are the first in the world with SoftWater Technology to remove these impurities. The ion-exchange filtering system optimises the water entering the drum for detergents and softeners to work at maximum efficiency, even at the lowest temperatures. Gentle enough to keep fabrics feeling soft and colours looking their absolute best.

Test for colour-fastness performed on black polyester after 50 washing cycles at 30 degrees.

9000 SERIES | L9FEC966R

IT'S THE LITTLE BLACK DRESS GUARDIAN

No fading wash after wash*.

Imagine a washing machine that you can trust to keep your colours as vibrant and blacks as true as the day you bought them. Yet never compromising on cleaning performance. Washing deeply. Thoroughly. Every time. At last, there is no need to compromise performance for care.

While conventional washing machines need high temperatures to activate detergents and clean properly, the SoftWater Technology in AEG 9000 Series washing machines purifies and softens water before it enters the drum. So detergents can work at their best, even at the lowest temperatures. For the first time ever, you'll achieve the thorough clean of a 60 degree wash at just 30 degrees. Maintaining the colour, shape and feel of every garment. Wash after wash. It's more than a washing machine. It's the guardian of your clothes.

INTRODUCING THE DELICATE SHIRT DEFENDER

Every fibre protected.

Faultless fabric never goes out of style. Your delicate pieces need to be treated gently to ensure that their quality is timeless, no matter how often you wear them. To achieve this, AEG 8000 Series washing machines with advanced ÖKOMix Technology blend detergents and then softeners with water before they enter the drum. In other washing machines, less than half of the fibres are reached by softeners. ÖKOMix Technology guarantees that, for the first time ever, every fibre is cleaned and cared for, even with shorter cycles. Every thread, every stitch, every fibre. Expertly protected.

MEET THE EVERYDAY CLASSIC PRESERVER

Cares twice as effectively*.

Quality clothes are made to be worn, but everyday pieces need care to maintain their condition. In AEG 6000 Series washing machines, every load is measured to tailor each cycle and calculate just the right amount of water and energy the wash requires. Whether you wash one shirt or a full load, the washer will adjust accordingly, reducing wear and tear by taking the minimum amount of time necessary for a thorough clean. And reducing water, energy consumption and washing time for smaller loads. AEG washing machines keep clothes looking their best. Every wear, every wash.

IT'S THE WOOL SWEATER GUARDIAN

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day. Dryers with the AbsoluteCare® System have tailored programming to control precisely the movement and temperature of the drying drum. Holding delicate fibres aloft so silks keep their shape and wrinkles are reduced.

AbsoluteCare® System: redefining tumble drying for every fabric in your wardrobe. You can also use the new Outdoor Programme to restore water protection of outdoor garments better than air drying. The intelligent wool programme adapts the rotation used for treating hand-wash woollens so there's no shrinkage.*

Absolute Care® SensiDry® ProSense®

With the tailored wool programme, the fast drum speed ensures garments lay flat on the inside of the drum walls to replicate flat drying, preventing shrinkage or felting.

The silk programme ensures the drum runs at a low speed and low temperature, and uses a gentle reverse action in a very efficient way to reduce wrinkles.

The new outdoor cycle restores water protective garments better than air drying. An exact temperature is applied for a specific amount of time to ensure that water repellency is restored after washing.

The control panel has a stainless steel finish and large LED display.

7000 SERIES | T7DEE835R

INTRODUCING THE SHEER BLOUSE PROTECTOR

Tumble dryers once meant high heat. And high heat is something your clothes should never be exposed to. Your knitwear, cotton tees, business shirts – clothes you wear day in, day out - need special care to keep them feeling special. AEG SensiDry® Technology dries the fabrics at half the temperature of conventional tumble dryers, without significantly extending the drying time. Ensuring that garments are never subject to unnecessary heat. Reducing wear and tear. Helping to make sure that the clothes you wear often, look and feel like new, every day.

2 YEAR GUARANTEE

(HxWxD) in mm

MEET THE EVERYDAY QUALITY PRESERVER

Clothes that are exposed to too much heat and motion simply will not last. The ProSense® Technology in AEG tumble dryers uses temperature and humidity sensors to fine-tune the drying cycle every time, ensuring clothes are never over-dried. Whether you dry one shirt or a full load, the dryer will adjust accordingly to take the minimum time necessary. Reducing wear and tear. Protecting fabrics. Saving energy and time. Your everyday pieces are dried efficiently, monitored constantly and cared for cycle after cycle.

EVERY FIBRE PROTECTED IN ONE GO.

Classics stand the test of time, outlive trends and provide an integrated solution for looking sharp. The same as the new Kombi washer dryer with ÖKOMix Technology. It's the only machine on the market that pre-mixes detergents and softener separately in water before they enter the drum. Meaning they are activated before they reach fabrics, preparing clothes for the most thorough clean and the most even dry. Resulting in every fibre being reached. And every fibre receiving complete protection. All in one go. And all in less time thanks to the ÖKOPower NonStop programme that washes and dries 5kg in four hours. Allow us to introduce you to the defender of your classics.

(HxWxD) in mm
870 x 600 x 605

Specifications
Capacity: 10kg/6kg
Spin Speed: 1600rpm
Energy rating: A

aeg.co.uk/care

KEY FEATURES

ÖKOMix Technology
Unique pre-mixing of detergent, softener and water to reach every fibre.

DualSense® Technology
Adapts the temperature and movement of the drum to different types of fabric ensuring that every garment, from delicates to outdoor wear, retains its shape and integrity.

ProSense® Technology
Protects clothes from the wear and tear caused by excessive washing and drying. Automatically adjusts time, water and energy consumption to suit any load size.

A COMPLETE TREATMENT FOR OUTDOOR WEAR IN ONE GO.

Some specialist clothing – waterproofs, woollens – require specialist care. Which is where the intelligent system in our new Kombi washer dryer comes in. Drawing on the best DualSense Technology, it tailors the temperature and motion of the drum to different fabrics. Unlike other machines, the programme is adjusted according to the specified load, so that everything from textured jackets to soft jumpers can be carefully washed, dried and cared for in one go. For outdoor wear, functionality can be retained and restored, from water repellency to breathability. For delicates like handwash-only woollens*, tactility can be sustained, removing the need to filter fabrics between processes. Meaning no more dry-cleaning. And no more handwashing. Just the convenience of an integrated and complete treatment. Meet the restorer of your performance wear.

HEAT PUMP WASHER DRYER
L99695HWD

KEY FEATURES

5 YEAR GUARANTEE

SensiDry   OptiSense   ProSteam

The ÖKOKombi washer dryer uses heat pump technology in the drying phase. Drying takes place at very low temperatures compared to a standard washer dryer, ensuring the gentlest drying possible.

OptiSense ensures the best treatment for every garment by providing a cycle tailored to load size. Sensors adjust washing and drying times to avoid overwashing and overdrying.

Special steam programmes can be used to dewrinkle or refresh your clothes and are a good alternative to dry cleaning.

*This model does not have the Quiet Mark award.

NOTES

NOTES

ENERGY INFORMATION /
EU ENERGY EFFICIENCY INFORMATION

This scheme, which covers refrigerators, freezers, washing machines, tumble dryers, dishwashers and electric ovens is designed to offer consumers a standardised method of choosing the most energy efficient appliances.

For refrigerators and freezers, as well as stating the energy efficiency class (A+++ - most efficient, 'D' - least efficient) the label also gives the annual electricity consumption (i.e. running cost) freezing capacity, noise level and the usable storage capacity.

For dishwashers, as well as stating the energy efficiency class (A+++ - most efficient, 'D' - least efficient) the label also states the annual water consumption (lts), drying efficiency, place settings and noise level.

For washing machines, as well as stating the energy efficiency class (A+++ - most efficient, 'D' - least efficient) the label also states the annual water consumption (lts), load size (kg), spin speed efficiency and the washing & spinning noise levels.
Example of refrigeration energy label.

Example of dishwasher energy label.

Example of washing machine energy label.

For electric ovens, as well as stating the energy efficiency ('A' - most efficient, 'G' - least efficient), the label also states the energy consumption (in kWh) and the usable volume of the oven. If the oven is a double oven it will carry this information for both ovens.
